# Ancient Grains

CEREAL : NON-WHEAT

## millet

A productive crop with a short growing season, millet has been consumed for about 7,000 years. There are many types of millets but the most widely grown is pearl millet.

## barley

One of the earliest cultivated crops (about 10,000 years ago in Eurasia). Its name comes from old English: *bere* & *baerlic*.

## sorghum

A flowering grass that has over 25 different species. Originally domesticated in Africa, sorghum has the most wheat-like flavour for gluten-free flour.

## teff

Also called Williams Lovegrass, teff is native to the Horn of Africa. Its name is derived from the Amharic *teffa*, which means "lost". It is the world's smallest grain.

## oats

The common oat is a versatile crop that is grown for grain, flour, oatmeal, oat milk & stout. It is high in fibre & has cholesterol-lowering properties.

## fonio

Fonio is a type of small millet native to West Africa. They look almost like sunflower seeds but smaller. There is black fonio & white fonio. The white variety is also called "hungry rice".

PSEUDOCEREAL

## buckwheat

Although called common buckwheat or beech wheat, it is not related to wheat but sorrel & rhubarb. The seeds are triangular & are used like wheat. First cultivated in Southeast Asia in 6,000 BC.

## quinoa

Quinoa is from the same family as amaranth & spinach, that originated from the Andean region. It has been eaten for 3,000-4,000 years. Its name is from the Quechua words, *kinwa* or *kinuwa*.

## amaranth

Also called love lies bleeding, tassel flower, pendant or foxtail amaranth, & quilete. It is a common food source in India & the Andean region. A high-yield protein source that is easy to harvest & process.

## chia

From the mint family, chia is native to Mexico & Guatemala. Chia is *chian* in Nahuatl that means "oily". Its seeds are mottled brown, grey, black & white. Dense & crunchy, they taste like poppy seeds.

# Ancient Grains

CEREAL : WHEAT

**einkorn**

A wild species of wheat with larger grains than modern wheat. One of the first plants domesticated (about 10,000 years ago).

**spelt**

Also called *dinkel* wheat or hulled wheat, spelt has been cultivated since 7,000 BC. It was an important staple food in parts of Europe from the Bronze to Medieval Ages.

**emmer**

One of the first crops domesticated, native to the Fertile Crescent. The oldest emmer grains date back to 17,000 BC.

**kamut**

Also called Khorasan wheat or Oriental wheat. The grains are twice the size of modern wheat, & has a rich, nutty flavour.

**bulgar**

Its name comes from Turkish *bulgur* or *burghul*. Bulgar is made from cracked, parboiled groats of several species of wheat (mostly durum wheat).

**farro**

Popular in Mediterranean cuisine, farro refers to multiple types of wheat brought to Rome around 44 BC. It looks and tastes like barley with a slight caramel note.

**freekeh**

Also called *frikeh* or *farik*, freekeh is made from durum wheat that is harvested while the grains are green & soft. They taste similar to brown rice.

**rye**

Rye is a member of the wheat family, although it is also closely related to barley. It grew wild in Central & Eastern Turkey, and has been cultivated since the Middle Ages.

# BEETS

## red beets

Also called purple beets. Strong earthy flavor & intense magenta color that can stain pink.

## golden beets

Also known as yellow beets. Bright yellow flesh with a milder & less earthy flavour than red beets.

Also called striped or Bazzano beets. Flesh colors can range from bright red to yellow-orange. An heirloom variety from Chioggia, a northern town in Italy. Sweet & earthy flavor.

## chioggia beets

## white beets

White exterior & interior, hence its name. Originally from Holland, they have a round shape & are very sweet (sweet enough to make sugar).

## boldor beets

A type of golden beet with bright yellow flesh & bright green leaves. Sweet, delicious flavour.

## cylindra beets

An heirloom Danish variety. Also called Butter Slicer or Formanova. They have burgundy skin & bright red flesh. Sweeter than most varieties with a fine texture.

## baby beets

Young beets that are pulled in spring to thin the field. Can be any variety of beets. Very tender with luscious greens.

## mangel-wurzel beets

Originally grown only for fodder. A rare heirloom variety from Europe also known as Mangel Beets. Sweet flavor & can be mashed like potatoes.

## sugar beets

Grown for the commercial production of sugar. 20% of the sugar production in the world come from sugar beets. Off-white in color & looks like a turnip.
